Address: Bangkok, Thailand

PROFILE

Third-year Digital Science and Technology student at Mahidol University interested in applied machine learning on real-world data. Built a chest X-ray pneumonia classifier end to end, from patient-level evaluation and Grad-CAM to a CPU demo, and benchmarked vision-language models as a research intern in Taiwan. Quick to learn new tools and enjoy turning data into clear insights.

EDUCATION

B.Sc. in Digital Science and Technology, Mahidol University — **2024 – Present**
Faculty of ICT · Expected graduation: 2028

EXPERIENCE & AWARDS

Research Intern — National Central University, Taiwan — **Jun 2026 – Jul 2026**
Information Processing Laboratory

- Deployed and benchmarked vision-language models on CPU, iGPU and NPU (ONNX, INT8).
- Built an offline 5-mode AI assistant app in Python for visually impaired users.
- Evaluated model safety with a teammate and field-tested the app at real street crossings.
- Presented progress in English weekly and co-wrote the English research report.

Startup Excellence Award — 2026 QianliMa Rising Startup Competition · Aug 2026
EveChip, endometrium-on-chip startup · International Division

- Proposed adding AI image analysis to the product and built the working prototype.
- Invited back by Prof. Ching-Yun Chen (NCU) to continue this work as a research intern in 2027.

PROJECTS

Chest X-ray Pneumonia Classifier · Personal project (ML Zoomcamp) — **Oct 2026 – Present**

- Fine-tuned ResNet18 on pediatric chest X-rays with a patient-level split; test AUC 0.96.
- Ran EDA, Grad-CAM and model comparisons; shipped an INT8 ONNX demo on Hugging Face.

Sakura Soul — Apartment Management System · QA (DevOps course) — **Aug 2026 – Present**

- Wrote live end-to-end tests (Playwright) that run against the real backend and database.
- Reported and triaged bugs in Jira, reviewed pull requests and ran regression tests.

StudySpot — Study-Place Finder App · Backend (Mobile App course) — **Jan 2026 – Apr 2026**

- Built the Firebase backend: authentication, Firestore data model and security rules.
- Implemented reviews with automatic rating updates, saved places and image upload.

Bookstore Database System · Database Design (Database course) — **Jun 2025 – Sep 2025**

- Designed the ER diagram, schema and data dictionary for a bookstore database.
- Normalized the database to improve data consistency.

SKILLS & COURSEWORK

- Programming: Python, SQL, TypeScript/JavaScript, Node.js, Dart, C, HTML/CSS
- AI / Data: PyTorch, scikit-learn, Hugging Face, ONNX Runtime, OpenCV, YOLOv8, pandas, NumPy
- Data & tools: PostgreSQL, Firestore, Git/GitHub, Docker, Gradio, Playwright, Jira, Colab
- Certifications: Kaggle Learn (Pandas, Intro to ML) · Cisco CCNA: Introduction to Networks
- Coursework: Machine Learning, Data Science, Cloud Computing (AWS), DevOps · ML Zoomcamp
- Languages: Thai (native), English (working proficiency)
